Certificate
IT PROJECT MANAGEMENT

The IT Project Management Certificate is a Post-Degree Certificate designed to expose students to information technology and its place in the modern business environment. Students will learn entry-level skills in IT project planning and coordination, networking concepts, IT security fundamentals, and Voice over IP fundamentals. Students will also learn the Project Management Professional (PMP) framework and risk analysis. Successful students will be prepared to move into entry-level roles as project coordinators on IT development projects and to sit for the Certified Associate in Project Management CAPM® exam.

Admissions into the program require at least an associate degree or higher.

The IT Project Management Certificate can be completed via hybrid (50% face-to-face/50% online) and 100% online options. To offer the highest degree of flexibility to our students, the IT Project Management Certificate is available 100% online from the comfort of your own home.
