

IFB0124-17 WELLDING LAB CUSTOM BUILD AND INSTALLED FIXTURES

ADDENDUM 2

PRE-BID MEETING, APRIL 24TH, 3:00 PM

QUESTIONS AND ANSWERS

Question 1:

Q. Will there be a curtain rod on the welding booths?

A. Yes, but the College will be responsible for cutting holes for the rods and installing the rods and curtains.

Question 2:

Q. Regarding the Powder Coating colors, we can't purchase directly from the manufacturer without purchasing large quantities.

A. The College expects the vendor to match the Lincoln and Miller colors as closely as possible. We will ask for a sample of the color for approval prior to the application of the paint.

Question 3:

Q. How should the back panels be connected to the side panels?

A. They will be bolted with approximately (5) bolts each along with intermittent welds at the joints. No screws are to be used. They need to be solid and un-moveable.

Question 4:

Q. What type of casters should be installed on the hoppers?

A. We would like polymer wheels.
