

HORRY GEORGETOWN TECHNICAL COLLEGE

It is the intention of Horry Georgetown Technical College to sole source the procurement of:

zSpace Virtual Reality Education Solution products from zSpace, Inc.

This product will be used to enhance our student's technical training and skill sets in conjunction with our visualization wall for state of the art training. Our Clinical and ECG programs will primarily, use it.

The Automotive VR Training System offers extraordinary hands-on experiences while improving student interest and performance in mechanic training. These applications greatly expand the opportunities available to students by eliminating consumables, reducing training space, and allowing students to practice in a safe environment.
